# Test-2

SPB
DATE :

1. write a prog for the following?

input : < 50 output : poor
input : between 50 and 60 output : Average
input : above 60 output : Good
Above 75 exellent

Ans:-

```
public class condi{
    public static void main(String[] args){
if for(int i = 40);
    for if( int i = 70);
                if (i<=50){
    System.out.println("poor");
  } else if(i<=50to60){
    System.out.println("Average");

  } else if (i<=60){

    System.out.println("Good");
  } else if(i<=75)
      System.out.println("Exellent");

  }

}
```

2) write a program to print only even numbers from 1 to 50.

SPB

DATE :

```
public class progEven {

    public Static void main (String[ ]args) {
        for (int i =1&&);
     if for (i =1
                i<=50; i++){
    }  if(i % 2 ===0){
          System.out.println(i);
       }
    }
}
```
